

Guest lecture

We are pleased to announce a guest lecture by **Dr. Ginny Paleg**, experienced and renowned physical therapist and researcher, and associate member of CanChild, McMaster University, Canada

Learning in Motion: Active Strategies to Get Students Standing and Stepping

As special education teachers, we recognize that every movement opportunity—whether stepping, standing, or transferring—can be a powerful teaching moment for our non-ambulatory students. These actions not only support physical development but also foster communication, engagement, and independence. By intentionally incorporating these movements into daily routines, we affirm each student's dignity and potential for growth in every step.

The lecture will be held in English and is open for all lecturers and students of the faculty of rehabilitation sciences. If you plan to attend, please contact riclef.schomerus@tu-dortmund.de

June 24th, 2025, 10:15 – 11:45 am, Room 4.435

Dr. Ginny Paleg has dedicated 40 years to empowering mobility, engagement, and participation for children who are non-ambulatory. Dr. Paleg has published in over 40 peer-reviewed journal articles, and presents clinical solutions in power mobility, supported stepping and standing, hypotonia, and hip health.

As a dedicated member of AACPD and APTA, she champions early detection of cerebral palsy and advocates for evidence-based care for non-ambulatory children. Social media is her chosen tool for knowledge translation.
